DETAILED ACTION

Please Note: In an effort to enhance communication with our customers and reduce processing time, Group 1615 is running a fax response pilot for Restriction Pilot for Written Restriction Requirements. A dedicated fax machine is in place to receive your responses. The Fax number is (703)- 746-5215. A Fax cover sheet is attached to this office action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact, Thurman Page, Supervisory Patent Examiner, at (703)-308-2927. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to written restrictions.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18 and 20-22, drawn to a leave-in hair cosmetic composition comprising flexible microspheres and water soluble polymer, classified in class 424, subclass 70.1.
- II. Claims 19 and 23, drawn to a leave-in hair conditioning composition comprising a thickening system and flexible microspheres, classified in class 424, subclass 70.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the leave-in

Art Unit: 1615

hair composition of group I is different from that of group II because the former does not require a thickening system that is essential for group II. The composition of group I can be used for hair conditioning without achieving any thickening effect. Whereas, the composition of group II requires at least two thickening agents that comprise a thickening system, for imparting appropriate viscosity or rheological properties, apart from the conditioning effect of the composition.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

If applicants choose to elect Group II, they are further required to elect one of the following species

This application contains claims directed to the following patentably distinct species of thickening polymer in the claimed invention:

1. Hydrophobically modified cellulose ether
2. Acrylate polymer
3. Cross linked polymer having the formula $(A)_m(B)_n(C)_p$

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 19 is generic.

Art Unit: 1615

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Brent Peebles on 4-4-02 to request an oral election to the above restriction requirement, but did not result in an election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1615

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
